Offer does not include the geodesic dome, neither a covering membrane. The flooring system is designed for Opendome 30 and we cannot guarantee proper fitment to geodesic domes by other manufacturers. Floor is in overall fine shape. Plywood has visual marks and needs refurbishment or replacement.

About Opendome 30

The smallest event dome - Opendome 30 - has a flooring area of 323 sq ft and offers a wide range of possible applications. Thanks to its relatively small size, it works amazingly well in crowded areas. It is the perfect info point, endorsement area for a sponsor of an event, an exclusive recreational spot next to the hotel pool or a relaxation area in your own garden. The small dome tent is also an ideal addition to all the large Opendomes structures.

About Premium Floor System

Stable base for every event. Premium Floor is based on a steel frame that maps the shape of the perimeter of the tent and is fixed with the structure of the dome. The floor itself serves as ballast and reduces to minimum the amount of additional weight required to keep the structure down.
